MULTICAP SUPER GROWTH HIGH MOMENTUM STRATEGY

This Strategy has quality Multi Cap Stocks from Nifty Total Market Index with Super Sales & Profit growth and high momentum.

METHODOLOGY

Multi-factor investing is an investment strategy where you build and manage a portfolio based on multiple factors. Instead of relying on just one style—like “value investing” or “growth investing”—you blend several factors to improve diversification and potentially enhance risk-adjusted returns.

Key Factors Commonly Used

1. Value – Stocks trading at low prices relative to fundamentals-like P/E ratio, Future P/E, TTM PEG, Future PEG
2. Momentum – Stocks with strong recent performance tend to continue doing well
3. Quality – Stocks with strong balance sheets, stable earnings, and good profitability.
4. Market Share – Stocks are continuously increasing market share with high sales growth
5. Smart Money – Domestic and Foreign institutional Investors are continuously buying the stocks
6. Basket – Nifty Total Market Index

How It Works:

Portfolio Construction: Stocks are screened and ranked according to those factor scores and weighted equally.

Diversification: By blending multiple factors, the strategy reduces the risk that any single factor underperforms for too long.

| | |
|--|---|
| Market Cap Category - Equity Multi Cap | Average Profit Growth YoY - 53.50 |
| No. of Sectors & Subgroups – 11 & 20 | Average Sales Growth YoY – 38.00 |
